Urologic Consultants of Southeastern Pennsylvania Chooses UroChartEHR

Springfield, Missouri –December 22, 2008 – Craig Frazier, president and CEO of Intuitive Medical Software, LLC, announces Urologic Consultants of Southeastern Pennsylvania, LLP of Philadelphia, PA, has selected UroChartEHR to replace its existing health record system.

“The physicians and staff at Urological Consultants are thought leaders on the use of technology, best medical practices and operational efficiencies in urology, and we are honored that they choose UroChartEHR” says Frazier. “This type of collaboration will accelerate innovation as we continue to expand the advantages physicians gain through the use of EMR and interoperability with other healthcare service providers.”

"Given the large and diverse nature of our practice and providers, UroChartEHR was the EHR solution that offered the best fit. UroChartEHR is Urology-specific and intuitive to use which allows our providers and staff to learn the documentation of clinical activity quickly and focus on the practice of Urology." States Dr. Phillip Ginsberg of the recent purchase of UroChartEHR.

Urologic Consultants of Southeastern Pennsylvania is the largest private practice urology group in the city of Philadelphia with fourteen physicians practicing at eight main and three satellite offices. Intuitive Medical Software is interfacing with their lab, Plus Diagnostics and their practice management software, Doc-tor.com

“We have been live on the UroChartEHR system for four weeks now. We have already seen operational improvements and have set the stage for connectivity to other healthcare service providers”, says Dr. Jamison Jaffe, Director of Minimally Invasive Urologic and Robotic Surgery for Hahnemann University Hospital. “We will continue to lead the way toward the effective use of technology as a state-of-the-art provider of urological care and UroChartEHR is the centerpiece of our information management strategy.”

Increasingly, urology practices across the country are opting for UroChartEHR’s innovative design and functionality. UroChartEHR provides a user-friendly product, with a visually appealing graphical user interface, which is the number one compliment IMS receives from its users.

About Intuitive Medical Software, LLC

Founded by Dr. Howard Follis, Intuitive Medical Software, LLC develops software products for select surgical and medical specialty physicians in the US. UroChartEHR, IMS' flagship product, is streamlined for urology practices. Recognizing the short-comings of generic EHRs when used in specialty practices, IMS has developed an EHR software product that combines a unique, efficient user interface with state-of-the-art database architecture. UroChartEHR includes IMS' patent-pending timeline method of organizing electronic medical records. IMS' current customers have found that once the urologists and their staff become familiar with the system, their clinic's efficiency and productivity rise. With its innovative approach to specialty EHR software, IMS plays a significant role in transforming the quality of our nation's healthcare. Intuitive Medical Software, LLC is not associated or affiliated in any way with Intuitive Surgical, Inc.
