Intuitive Medical Software Announces UroChartEHR v3.0 Release

Springfield, Missouri – July 22, 2009 – Craig Frazier, President and CEO of Intuitive Medical Software, LLC (IMS), announces the release of UroChartEHR v3.0.

UroChartEHR v3.0 is a CCHIT Certified 08 Ambulatory EHR. The 2008 certification is a step above the 2007 certification in that The Commission added 19 criteria to the 200 required in 2007. Those changes were focused on the ability to exchange patient information with other systems.

“Two key new areas of interoperability are required to achieve 08 certification,” says Mark Leavitt, M.D., Ph.D, Chair, CCHIT. “First, ambulatory EHRs must be capable of advanced electronic prescribing functions so physicians can qualify for bonuses under Medicare’s new incentive program. Second, EHRs must be able to send and receive an electronic patient summary. These and other new criteria will ensure that certified health IT products help improve quality, safety and efficiency while protecting the privacy of health information.”

“We have been preparing this version to meet IMS’ high standards,” says Frazier. “We are excited to finally release UroChartEHR v3.0 which meets not only our specifications, but those of CCHIT as well.”

UroChartEHR v3.0 introduces electronic prescribing through a partnership with DrFirst using Rcopia, their GoldRX Certified electronic prescription management system. This achieves Surescripts certification, becoming a Surescripts Certified Solutions Provider™.

The new e-Prescribing in UroChartEHR v3.0 allows physicians to electronically send prescriptions to a large number of pharmacies across the nation, as well as receive refill requests and give approval electronically.

Physicians and staff will be able to view drug to drug, drug to allergy, and drug to disease interactions; complete prescribing histories; and formulary information. Users can easily access Rcopia from within the UroChartEHR Desktop, and all resulting data is instantly captured within the application.

The new release includes many new features and enhancements, including:

- Order Sets.
- Lab Module using a discrete display and graph.
- Reports for Quality Improvement Initiative. Users can now search by age, gender, diagnosis and procedure.
- Mid-Level practitioner signing of charts.
- Disease management & health maintenance in the form of Alerts/Reminders.

“We continually strive to extend UroChartEHR’s intuitive feel to all areas of the product,” says Debbie Marti, Vice President of Product Development.

As the demands of the industry increase, IMS makes sure that UroChartEHR meets those demands in the most intuitive, efficient, and productive means for our providers and staff.

About Intuitive Medical Software, LLC

Founded by Dr. Howard Follis, Intuitive Medical Software, LLC develops software products for select surgical and medical specialty physicians in the US. UroChartEHR, IMS' flagship product, is streamlined for urology practices. Recognizing the short-comings of generic EHRs when used in specialty practices, IMS has developed an EHR software product that combines a unique, efficient user interface with state-of-the-art database architecture. UroChartEHR includes IMS' patent-pending timeline method of organizing electronic medical records. IMS' current customers have found that once the urologists and their staff become familiar with the system, their clinic's efficiency and productivity rise. With its innovative approach to specialty EHR software, IMS plays a significant role in transforming the quality of our nation's healthcare. Intuitive Medical Software, LLC is not associated or affiliated in any way with Intuitive Surgical, Inc.

“CCHIT®” and “CCHIT CERTIFIED®” are registered marks of the Certification Commission for Healthcare Information Technology.
