Academic Urology of Pennsylvania, LLC Chooses UroChartEHR

Springfield, Missouri – March 12, 2009 – Craig Frazier, president and CEO of Intuitive Medical Software, LLC, announces Academic Urology of Pennsylvania, LLC has selected UroChartEHR to replace its existing health record system.

Dr. David Ellis, Academic Urology’s EMR Committee Chair spoke “Academic Urology is very pleased and excited to join the growing UroChartEHR family. Academic Urology spent a year doing its homework on EMR. We found UroChartEHR to be ‘just what the doctor ordered’ (if that doctor is an urologist). After all, it was created by an Urologist.”

Academic Urology of Pennsylvania employs twenty-six physicians with eight mid-level practitioners at thirteen different offices throughout the state. UroChartEHR is interfacing with QDx Pathology and MedEvolve, Inc., the lab and practice management software for the large practice.

“UroChartEHR’s superior urology content and intuitive user interface combine to provide the fastest, most efficient solution available to a busy, growing practice,” says Frazier.

Urology practices across the country are opting for UroChartEHR’s innovative design and functionality. UroChartEHR provides a user-friendly product, with a visually appealing graphical user interface, which is the number one compliment IMS receives from its users.

“UroChartEHR proves to have specialty specific features that make it the best choice for our large single specialty Urology group. We look forward to taking advantage of its ease of use while gaining the benefits of e-prescribing, PQRI, and the Obama stimulus,” states Dr. Ellis.

About Intuitive Medical Software, LLC

Founded by Dr. Howard Follis, Intuitive Medical Software, LLC develops software products for select surgical and medical specialty physicians in the US. UroChartEHR, IMS' flagship product, is streamlined for urology practices. Recognizing the short-comings of generic EHRs when used in specialty practices, IMS has developed an EHR software product that combines a unique, efficient user interface with state-of-the-art database architecture. UroChartEHR includes IMS' patent-pending timeline method of organizing electronic medical records. IMS' current customers have found that once the urologists and their staff become familiar with the system, their clinic's efficiency and productivity rise. With its innovative approach to specialty EHR software, IMS plays a significant role in transforming the quality of our nation's healthcare. Intuitive Medical Software, LLC is not associated or affiliated in any way with Intuitive Surgical, Inc.
