**Intuitive Medical Software Adds to Its Mobile Application**  
*UroChartEHR for the Apple iPhone and BlackBerry Storm*

**Springfield, Missouri – April 13, 2009** – Intuitive Medical Software, LLC’s (IMS) UroChartEHR is now available on the BlackBerry® Storm™. IMS originally introduced their EHR mobile application on the Apple® iPhone™, being the first EHR product to provide urologists 24/7 access to office and surgery schedules, rounds lists complete with bed assignments, and patient data including charts, all in the palm of your hand.

UroChartEHR Mobile provides urologists the opportunity to gain unprecedented efficiencies while providing services at the hospital, ambulatory surgery centers, or any location without traditional UroChartEHR access.

“UroChartEHR Mobile lets urologists spend more time focusing on patients, instead of the paperwork,” says Debbie Marti, Vice President of Product Development at IMS. “This really opens the door for urologists to become more efficient in their daily workflows, without having to rely on a computer to get access to important patient information – it’s all accessible at their fingertips.”

UroChartEHR Mobile devices feature true state-of-the-art technology that changes the way we think about mobile devices. Their unique user interfaces, along with the most advanced mobile web browsers available, provide devices robust enough for a “no-compromise” mobile UroChartEHR solution.

“UroChartEHR Mobile uses UroChartEHR as the model for its intuitive and revolutionary user interface,” adds Marti. “We’ve designed it specifically for use on these two devices so that urologists can have access to patient data anytime, anywhere.”

The mobile application provides users with charge capture for off-site services and one-touch dialing of referring or primary physician.

**About Intuitive Medical Software, LLC**

Founded by Dr. Howard Follis, Intuitive Medical Software, LLC develops software products for select surgical and medical specialty physicians in the US. UroChartEHR, IMS' flagship product, is streamlined for urology practices. Recognizing the short-comings of generic EHRs when used in specialty practices, IMS has developed an EHR software product that combines a unique, efficient user interface with state-of-the-art database architecture. UroChartEHR includes IMS' patent-pending timeline method of organizing electronic medical records. IMS' current customers have found that once the urologists and their staff become familiar with the system, their clinic's efficiency and productivity rise. With its innovative approach to specialty EHR software, IMS plays a significant role in transforming the quality of our nation's healthcare. Intuitive Medical Software, LLC is not associated or affiliated in any way with Intuitive Surgical, Inc.

## **About Apple**

Apple ignited the personal computer revolution in the 1970s with the Apple II and reinvented the personal computer in the 1980s with the Macintosh. Today, Apple continues to lead the industry in innovation with its award-winning computers, OS X operating system and iLife and professional applications. Apple is also spearheading the digital media revolution with its iPod portable music and video players and iTunes online store, and has entered the mobile phone market with its revolutionary iPhone.

## **About RIM**

Research In Motion is a leading designer, manufacturer and marketer of innovative wireless solutions for the worldwide mobile communications market. Through the development of integrated hardware, software and services that support multiple wireless network standards, RIM provides platforms and solutions for seamless access to time-sensitive information including email, phone, text messaging (SMS and MMS), Internet and intranet-based applications. RIM technology also enables a broad array of third party developers and manufacturers to enhance their products and services with wireless connectivity to data. The award-winning products, services and embedded technologies offered by RIM are used by thousands of organizations around the world and include the BlackBerry® wireless platform, the BlackBerry smartphone, software development tools, radio-modems and other hardware and software. Founded in 1984 and based in Waterloo, Ontario, RIM operates offices in North America, Europe and Asia-Pacific. RIM is listed on the Nasdaq Stock Market (Nasdaq: RIMM) and the Toronto Stock Exchange (TSX: RIM).
